Trusted Introducer

# Regionale, Cittadino, Personale

- ❑ Esiste un problema “Cybersecurity” per gli **enti locali**, e **sanitari**?
- ❑ Quali sono le **opportunità** per la Cyber, sul territorio?
- ❑ Perché il **digital divide** é oggi così importante?
- ❑ Telco Networks: la prima **linea di difesa**
- ❑ Collaborazione **pubblico/privato**?

# Conclusioni

- ❑ Perimetro Italia ed Europa : Livelli di difesa da **minacce ibride**
- ❑ Pubblico / Privato : **Inizia da Noi / Voi**
- ❑ Piccole Imprese : approfondite l'OpenSource e l'OSINT come **strumenti per iniziare**
- ❑ Privacy del Cittadino Digitale : anche questa, temo, **inizia da Noi / Voi**

HEREBY RECOMMENDS that Italy take action in 2022 and 2023 to:

1. In 2023, ensure prudent fiscal policy, in particular by limiting the growth of nationally-financed current expenditure below medium-term potential output growth, taking into account continued temporary and targeted support to households and firms most vulnerable to energy price hikes and to people fleeing Ukraine. Stand

ready to adjust current spending to the evolving situation. **Expand public investment for the green and digital transition and for energy security, including by making use of the RRF, RePowerEU and other EU funds.** For the period beyond 2023, pursue a

through gradual consolidation, investment and reforms. In order to further reduce taxes on labour and increase the efficiency of the system, adopt and appropriately implement the enabling law on the tax reform, particularly by reviewing effective marginal tax rates, aligning the cadastral values to current market values, streamlining and reducing tax expenditures, also for VAT, and environmentally harmful subsidies while ensuring fairness, and by reducing the complexity of the tax code.

2. Proceed with the implementation of its recovery and resilience plan, in line with the milestones and targets included in the Council Implementing Decision of 13 July 2021. Swiftly finalise the negotiations with the Commission of the 2021-2027 cohesion policy programming documents with a view to starting their implementation.

3. Reduce the reliance on fossil fuels and diversify energy import. Overcome bottlenecks to increase the capacity of internal gas transmission, develop electricity

**interconnections, accelerate the deployment of additional renewable energy capacities and adopt measures to increase energy efficiency and to promote sustainable mobility.**

*For the Council  
The President*

Brussels, 23.5.2022
